SUMMARY

Software Developer at Wipro with hands-on experience in Java Full Stack development, including Core Java, Spring Boot, REST APIs, Microservices, and MySQL. Also experienced in Flutter and Firebase application development.

WORK EXPERIENCE

- Developer L1 | Wipro Limited**

March '26 – Present

 - Completed structured Java Full Stack training covering Core Java, Spring Boot, Microservices, MySQL, HTML, CSS, and Bootstrap.
 - Developed a Loan Management System as a milestone project using Spring Boot and Microservices architecture.
 - Gained hands-on experience in developing backend services and implementing microservice-based application architecture.
 - Completed GitHub Copilot training, gaining exposure to AI-assisted software development and developer productivity tools.
- Flutter Developer Intern | Meity Project MANUU**

Mar 2024 - Jun 2024

 - Created interactive 2D games using Flutter, focusing on drag-and-drop mechanics.
 - Designed games to enhance cognitive skills and provide an engaging learning experience for mentally disabled children.
 - Implemented responsive and user-friendly UI components to cater to the specific needs of the target audience.

PROJECT

- UniShare – Student Belongings Exchange and Reuse Platform**
 - Developed a mobile app to facilitate students in selling, donating, and obtaining products using Flutter and Firebase as the backend.
 - Followed MVVM architecture with GetX for efficient state management and used SharedPreferences for data persistence.
 - Designed a seamless and user-friendly interface to promote sustainability and community-building among students.
- Zenify – Spotify Clone Mobile App**
 - Built a Spotify clone using Flutter, Dart, and Firebase for data management and authentication.
 - Designed a user-friendly UI and implemented BLoC with clean architecture for scalability.
 - Developed core features including music playback, search, favorites, and artist details.
